

We are here and our centers are safe.

Keeping up on your regularly scheduled appointments is important to remaining happy, healthy, and out of the hospital. That's why we've made our centers safe for you to see your primary care provider.

Here's what we're doing to protect your health at our centers:

Reduced number of people in the center

Provide COVID screening for all patients and team members

Frequent cleaning and sanitizing procedures

Protective equipment protocols, including providing masks to patients coming for in-person visits

Rest assured, you can get the care you need safely at Oak Street Health.
